

## Download and Extract Module Files

- 1- First, you need to download the module file from [GitHub](#).
- 2- Log in to your cPanel and go to your File Manager, and extract the downloaded module file into the **root** directory of WHMCS.
- 3- Navigate to the caasify-whmcs-module directory and move the contents to the main WHMCS directory.
- 4- After copying, check the path whmcs/modules/addons/caasify. If the **caasify** folder is there, the installation was successful.

## Enabling the Module

- 1- Log in to the WHMCS admin page and navigate to "**System Settings > Addon Modules**".
- 2- Find the **Caasify** module, click on "Activate".

Addons

 **Addon Module Deactivated**  
The selected addon module was deactivated successfully.

This is where you can activate and manage addon modules in your WHMCS installation. Older legacy modules will still allow you to activate/deactivate and configure access rights, but will not be able to show any configuration options, version or author information.

Module	Version	Author			
» <b>Bulk Pricing Updater</b> This addon utility allows you to perform system wide price changes to existing clients	3.0	WHMCS	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>
» <b>Caasify</b> This addon utility allows you to easily connect to Caasify Marketplace to sell almost everything	1.0.1	Caasify	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>
» <b>Google Analytics</b> This module provides a quick and easy way to integrate full Google Analytics tracking into your WHMCS installation	3.0	WHMCS	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>
» <b>Licensing Manager</b> <small>PREMIUM</small> License, restrict & distribute your own coding and applications using the same system we use for WHMCS. Find out more & purchase @ <a href="http://www.whmcs.com/addons/licensing-addon">www.whmcs.com/addons/licensing-addon</a>	3.1	WHMCS	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>
» <b>MailChimp</b> Integrates with the MailChimp email service for newsletters and email marketing automation.	1.0	WHMCS	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>
» <b>PayPal Transaction Lookup</b> This addon shows your PayPal account balance on the admin homepage & allows you to search PayPal Transactions without needing to login to PayPal	2.0.1	WHMCS	<a href="#">Activate</a>	<a href="#">Deactivate</a>	<a href="#">Configure</a>

3- After Activation, click on "**Configure**", now you need to configure the module parameters as in the following image. Default values are the best options.

4- For **Caasify Currency**, you must add **EURO** currency to your WHMCS in (**System Settings > Currencies**), then select **EURO** Here as Caasify Currency.

5- For **Reseller Token**, you must register in (<https://my.caasify.com>) then log in and find Your Reseller Token on the home page

The screenshot displays the CAASIFY user interface. On the left is a dark sidebar with the CAASIFY logo and navigation links: Home, Billing, Support, and Open Ticket. The main content area is titled 'Profile' and contains the following information:

- Name:** Ali mahdavi
- Email:** test@test.com
- Token:** 108|Dd6gB6AmdugB5lBnZgB6d9f62d66 (with copy and visibility icons)
- Finance:**
  - Caasify Balance: 0.00 € Euro
  - User Credit: 10.00 € Euro

At the bottom of the profile section, there are two buttons: 'TopUp' and 'Move Balance'.

6- **Commission** filed is your desired commission percentage, if you like to have 10% margin then you should record 10.

7- We suggest not changing the other fields and then clicking on the **Save Changes** button. the module is successfully installed.

» **Caasify**  
 This addon utility allows you to easily connect to Caasify Marketplace to sell almost everything

1.0.1    Caasify    Activate    **Deactivate**    Configure

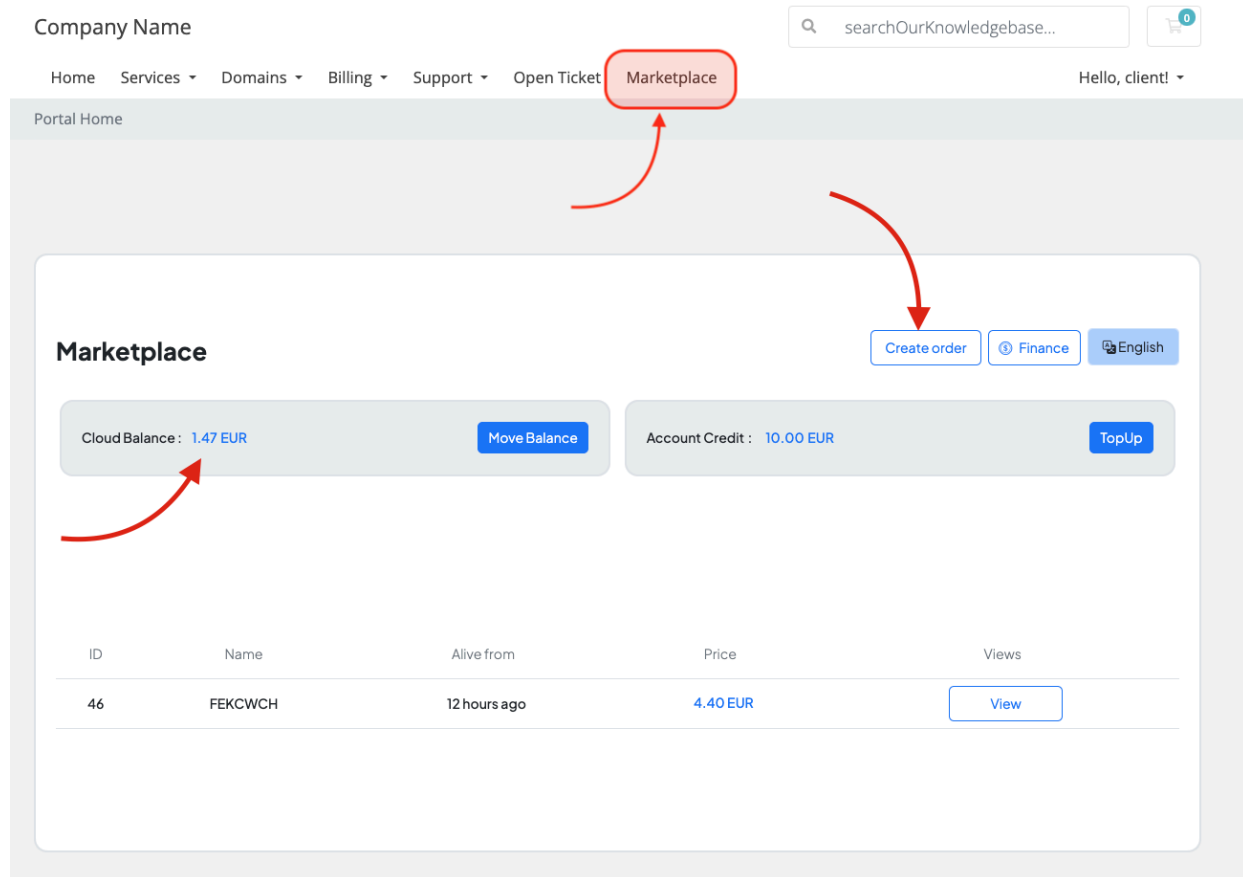

Backend URL	https://api.caasify.com	Default is (https://api.caasify.com)

Save Changes

## Placing an Order

1- For testing the module's functionality, you can log in to one of your customer accounts in WHMCS. From now on, you will have a new tab called "**Marketplace**" in your WHMCS menu.

2- Click on the "**Marketplace**" tab and then click on the "**Create Order**" option, then you will be sent to the Create **Page**.

3- In the **Create Page**, you can view the list of products available in the marketplace. Follow the instructions and select your preferred config for your order.

**Note:** you may be unable to create order due to lack of client balance.

## Adding Funds on WHMCS

To allow your users to add funds to their accounts and create services on an hourly basis, you need to enable the **"Add Funds"** option in WHMCS.

To activate this option, go to **"System Settings > General Settings"**, navigate to the **"Credit"** tab, and enable the option "Check to enable adding of funds by clients from the client area". Additionally, you can temporarily disable the **"Require Active Order"** option.
